# C O N T E N T S

- Fusuma
- Install
- Usage
- Slide
- Presenter Mode

WHAT IS FUSUMA?

# FEATURE

*Fusuma is a helper that easily make slides with markdown.*  
Aiming to be able to make slides and release them in quickly.

- make a cool slide with bespoke.js
- support development, production and deploy tasks
  - You do not have to write webpack, Babel, Postcss settings
- support OGP, SNS, Fullscreen and Presenter Mode

mechanism: <http://blog.hiroppe.me/entry/2017/12/07/100102>

# LIBRARIES

- Bespoke.js
- React
- Prism.js
- Workbox
- font-awesome

- 
- webpack
  - Babel
  - Postcss
    - cssnext
  - gh-pages

INSTALL

# INSTALL

```
$ npm i fusuma -D
```

```
# or
```

```
$ npm i fusuma -g
```

```
# if you use yarn
```

```
$ yarn add fusuma --dev
```

U S A G E

# COMMAND

## USAGE

```
fusuma <command> [options]
```

## COMMANDS

start	Start with webpack-dev-server
build	Build with webpack
init	Create a configure file
deploy	Deploy to GitHub pages
pdf	Export as PDF
help <command>	Display help for a specific command

# CONFIGURATION FILE

Fusuma supports `yaml` and `js`.

```
# .fusumarc.yml

meta:
  url:
  name:
  author:
  description:
  thumbnail:
  siteName:
  sns: # twitter, hatena
    - twitter
slide:
  theme:
extends:
  js:
  css:
```

`fusuma init` creates a configuration file.

# DIRECTORY STRUCTURE

```
.
├── .fusumarc.yml  <-- required
├── package.json

└── style.css       <-- optional
```

# SAMPLE TASKS

```
// package.json

{
  "scripts": {
    "start": "fusuma start",
    "build": "NODE_ENV=production fusuma build",
    "deploy": "npm run build && fusuma deploy"
  },
}
```

# SLIDE SYNTAX

<https://github.com/hiroppy/fusuma/blob/master/docs/slide.md>

P R E S E N T E R   M O D E

# S E T U P

- start from the 🚀 icon in the sidebar
- two windows are activated
  - the newly created window is the slide window
  - existing windows is for presenters

# S P E A K E R N O T E

This page is written with the following markdown.

```
<!-- note
This is a speaker note!!
This sentence can be seen when using Presenter Mode.
-->

## Speaker Note
```
